**\$/A: is calculated using the new Quality Payment System incorporating financial values from the Post Harvest Forecast.

Payment values are based on the MSC Post Harvest Forecast

Trial data is adjusted for the trial average T/A and RWST and company average T/A and RWST

A lower value is better for Cercospora, Rhizoctonia, Root Aphid, Aphanomyces, Fusarium, and Rhizomania.

Results are combined across 2 years which includes 7 locations in 2023 and 8 locations in 2024.
