

BREEDING CONFIDENCE

## MINN-DAK FARMERS COOP 2025 PRODUCT GUIDE

# NEXT-GEN BREEDING FOR NEXT-GEN CONFIDENCE

# WE'VE GOT BREEDING CONFIDENCE DOWN TO A SCIENCE

At Betaseed, we're using advances in science to optimize the potential of every seed you plant. Our state-of-the-art breeding and testing process takes up to ten years. It's the only way to ensure the hybrid your Betaseed rep recommends has the best traits to manage disease and drive yields on your farm.

## A DECADE OF RESEARCH AND DEVELOPMENT

**YEARS 1-3** NEW LINE CREATION

### **HAND CROSS**

Development of a parent with genetics for increased productivity.

### **SELFING**

The first step in seed multiplication.

### **PARTITIONS**

Production of test hybrids for early-generation decisions.

### **EXPERIMENTAL HYBRIDS**

Production of potential candidates for official variety trials (OVT).

# THE RIGHT TREATMENTS

Our sugarbeet seeds are specially treated to give them an extra layer of protection from seedling pests and diseases. In addition, the right treatment provides a wider window of opportunity for pesticide applications. Betaseed offers you unique solutions tailored specifically for your region.

## MINN-DAK REGION SEED TREATMENTS

**BetaShield®  
COMPLETE**

Allegiance, Thiram,  
Systiva, Tachigaren 35g,  
Poncho Beta
